

Special Meeting with EMO Coordinator - 28 March 1963

Lakehead Amateur Radio Club

Report on Special meeting held March 28/63 at the CD Clubroom-

The meeting began at 8:10 pm with Les Harris - VE3AYZ explaining about the various communication setups and their frequency and the type of science required to operate the equipment by operating personnel. He also made available a number of booklets and application forms which the Secretary Treasurer will bring to the General Meeting for distribution.

It was suggested that somebody go to Arnprior for a course in CD communications procedure - also that there was already a CD Net operating on the following Frequencies:

CW 3.535 MC
 7.050 MC
 14.060 MC and

AM 3.765 MC
 14.160 MC and
 28.250 MC.

Bev Biggs - VE3ECA had a very interesting plan on paper for a complete communication network for our local area.

Bev was also to arrange a demonstration for Mr. Art Widnall to show what amateurs could do in the way of communications.

Doug Hall - VE3TB did a good job of dictating the brief for Mr Widnall, after which we adjourned.
